Joker Suggests That They Will

Raise Salt Rising Bread.

Iola, Feb. 3.—Geo, A. Fry and Josh
Butler have received from Hutchinson a car load of sait, 40,000 pounds, which they will use in a new way.

Both have extensive farm interests which they look after themselves, and they propose to sow the salt with oats, wheat and flax, on the theory that land so treated is given the chemicals required by these grains and in the bellef that chinch bugs will shun the fields. Some of their unpractical town friends have rather a hankering for the bellef that wheat so treated will grow loaves of sait rising bread. At any rate the test is one which will be watched with interest and the farmers may reap good returns from the \$100 or more invested by these gentlemen in an experiment.
